NAME : Dakshata Chandrakant Salgaonkar

Div : SE3-B2

Roll No: 30

Branch : CSE-DS

Experiment No : 1

Experiment Title : Installation of XAMPP & Git, Creation of Git Repository, and Execution of Basic Git Commands

AIM : To install XAMPP and Git, create a GitHub account, set up a new Git repository, and execute fundamental Git commands such as add, commit, modify, view, and branch management for understanding version control.

Instructions:

1. Install XAMPP

2. Install Git. Create account in GitHub.

3. Go through the git_github pdf file and execute 4/5 git commands.

4. Take snapshot of git commands and your github account page. Save these in one docx file. Create pdf and upload it as submission part.

Git commands executed in Git Bash :

1.) Checking the Installed Git Version Using git –version

2.)Initializing a New Git Repository Using the git init Command

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git init
Initialized empty Git repository in C:/Users/Admin/Desktop/.git/
```

3.)Checking the Current Repository Status Using git status

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git status
On branch master

No commits yet

Untracked files:
  (use "git add <file>..." to include in what will be committed)
```

4.) Configuring Global Username and Email Using Git Config Commands

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git config --global user.name "Dakshata Salgaonkar"

Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git config --global user.email "salgaonkardakshta@gmail.com"

Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git config --global --list
user.name=Dakshata Salgaonkar
user.email=salgaonkardakshta@gmail.com
```

5.)

Creating a File Using the Echo Command

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ echo "Hii"> File1.txt
```

Adding a File to the Staging Area Using git add and Resolving the Warning Using core.autocrlf Configuration

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git add File1.txt
warning: in the working copy of 'File1.txt', LF will be replaced by CRLF the next time Git touches it

Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git config --global core.autocrlf true
```

Verifying the File Status Using git status

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git and File1.txt
git: 'and' is not a git command. See 'git --help'.

The most similar command is
        add

Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git status
On branch master

No commits yet

Changes to be committed:
  (use "git rm --cached <file>..." to unstage)
        new file:   File1.txt
```

6.) Executing the First Commit Using git commit

```
Admin@DESKTOP-R3I4054 MINGW64 ~/Desktop (master)
$ git commit -m "First Commit"
[master (root-commit) 4508ead] First Commit
 1 file changed, 1 insertion(+)
 create mode 100644 File1.txt
```
